

TIGER

Entry Level Floor Curing Machine

Light-weight and compact folding design is easy to transport and carry

Universal power input

Multi-language - Ships with over ten languages and more can be added via a simple USB update

Design and manufacturing:
HID UV, NJ, USA.

Distribution for Europe:
SADECHAF UV.

TIGER

The Tiger from HID Ultraviolet is a new revolutionary light-weight yet heavy-duty UV floor curing machine which shatters the price barrier to make site applied ultraviolet floor curing accessible to everyone! It is equipped with HID's exclusive patentpending Instant-On technology, curing speed readout, universal power supply, multiple language control panel, quick-folding handle, and on board diagnostics. The Tiger comes standard with HID's industry-leading safety features including: automatic safety shutoff for excessive tilt angle, non-movement, open covers, incorrect line input voltage, and cooling system deviation.

The Tiger is ideal for small jobs, confined spaces, and upper floor areas. It cures UV floor coatings for wood, concrete, and vinyl composite tile (VCT).

HID continues to innovate and lead with over 35 years of expertise designing and manufacturing ultraviolet equipment. All HID equipment includes the best warranty in the industry - the two year HID total satisfaction warranty.

'Site applied UV available for everyone'
